... have caught it at the final point where all data activity must pass through. The **Date Wizard** accomplishes this task through the dynamic creation of **intelligent database triggers** to audit, repair, or even block Y2K errors. Our competitors simply eavesdrop on networks using intrusive hardware or only provide workstation tools that parse through source **code**. Using **intelligent database triggers** is the only method to audit all runtime **database** traffic... There simply isn't any other way."
